

**Altrosil FINO** is a colourless inorganic/organic deep-acting surface impregnation which due to its chemical physical effect penetrates the near-surface layers of natural stones, artificial stones, brickwork and roof tiles.

Once used, **Altrosil FINO** brings out its full effect after a short period of time and protects the building materials permanently.

**Altrosil FINO** does not make special demands on the substrate, but acts on both - dry and wet substrates.

Due to a narrowing of the pore spaces and the capillaries in the building materials, the transport paths for water and salt are blocked effectively and permanently.

**Altrosil FINO** acts in the material and not only on the surface as it is the case with other products. It deeply protects the treated surfaces.

**Altrosil FINO** hydrophobizes the treated material surfaces and renders them nearly resistant to water.

**Altrosil FINO** minimizes the weathering of the treated surfaces considerably.

**Altrosil FINO** protects the treated surfaces to the greatest extent from dirt, lime and salt stain and facilitates the cleaning.

**Altrosil FINO** is free from organic solvents and mostly harmless to health in its use.

**Altrosil FINO** has an antistatic effect and contributes to a significant increase of the dust and abrasion resistance of the treated surfaces.

Nevertheless, the treated surfaces remain open to diffusion so that water vapour can still escape without disturbances.

As soon as **Altrosil FINO** has brought out its full effect after approx. 10 days, the building material is to the greatest possible extent protected against environmental influences.

Our technical service - in words, in writing or by trials - is given according to the current state of our knowledge. It does however not relieve the customer / user from the duty to check by himself if the products supplied by us are suitable for the intended processes and purposes. Application, use and processing of the products take place beyond our control possibilities and lie therefore exclusively in the area of responsibility of the processor. Any existing property rights of third parties are to be considered. We guarantee the perfect quality of our products in accordance with our general terms and conditions of business. When handling our products you have to observe the legal rules and the rules for the industrial hygiene. As for the rest, we refer to the corresponding safety data sheets.
